

Illinois Temporary Food Stand Food Safety Guidelines

These guidelines consider the temporary food stand's special circumstances and are intended to help operators comply with the Illinois Food Service Sanitation Code. Additional requirements may be imposed to protect the public's health or to prohibit the sale of some or all potentially hazardous foods. When no health hazard exists, some requirements may be waived.

Stand Construction

- Interior construction materials shall be suitable for use and easily cleanable.
- All openings to the outside shall be protected from flying insects by an effective air curtain, tight-fitting screens or doors.
- Stands shall be adequately screened and ventilated to the outside when grills, fryers or ovens are located inside the stand. The ventilation shall be adequate to removed trapped heat, smoke and moisture. Overhead protection of grills should be compliant with Fire Marshall Requirements.
- Floors shall be constructed of smooth and cleanable material and elevated off the ground. Cardboard may be used if removed from use on a daily basis or when observed soiled.
- Living quarters shall be completely partitioned or separated from food preparation or storage.

Food

- All food, including ice, shall be obtained from approved sources.
- All food preparation shall be done inside the stand except for approved outside cookers and grills.
- Foods from previous Fairs is PROHIBITED. Food brought from a permitted brick-and-mortar facility must have proof of facility permit and inspection. Temperature logs should be maintained during transportation.
- Food shall be protected from contamination at all times.
- Potentially hazardous foods – such as meats, eggs, dairy products (for example, cream-filled pastries), cut melon, cooked vegetables and grains – shall be held at temperatures **above 135 degrees F or below 41 degrees F**.
- Flash display of these foods should be rendered inedible.
- Only canned or bottled beverages may be stored on drained ice. This ice may not be used for human consumption.
- Opened containers of potentially hazardous foods must be labeled with the date they were opened. If the date is missing, the food item may be subject to destruction.

- Frozen potentially hazardous foods may be thawed in mechanical refrigeration units, under running water no warmer than 70 F or cooked frozen without interruption until done.
- Food and single service articles or utensils must be stored protected and off the floor.
- Ready-to-eat foods shall not be touched with bare hands. Disposable gloves, deli tissue, spatula, tongs or other utensils may be used to handle these foods.
- Self-serve condiments shall be individually packaged.
- To protect public health, the health authority may condemn any food found to be contaminated or to be held at unsafe temperatures.
- Foods stored outside of the stand should be protected from outside contamination, inclusive of mistreatment by the public.
- Foods that require cooling & reheating, extended cooking times, or other special processes are subject to approval before preparation and service.

Water

- All water used at the stand shall be from an approved source.
- Backflow prevention devices shall be used where appropriate.
- All plumbing shall comply with the Illinois Plumbing Code.
- Hoses used to provide water shall be of food-grade quality.

Equipment

- Equipment shall be located and installed to allow cleaning and to prevent food contamination.
- Food contact surfaces must be smooth and easily cleanable, maintained in good condition and protected from contamination.
- Scoops for potentially hazardous foods shall be stored with the handle up in running water wells, in still water above 135 F or below 41 F (ice water) or in the product.
- Refrigeration failure due to any type of power outage must be immediately reported to the regulatory authority.
- Accurate metal-stemmed thermometers shall be used to check food temperatures.
- Refrigeration for potentially hazardous foods must be equipped with an accurate numerical thermometer.
- Adequate equipment and space are required for temperature control of potentially hazardous foods.

- Temperatures of all refrigeration and hot food holding units shall be checked at least every two hours during operation. If a unit cannot be adjusted to maintain proper temperatures discontinue using it for storing potentially hazardous foods.
- Outside grills and cookers must have overhead coverings and barriers to safeguard the public.

Cleaning

- Utensils, equipment and the stand must be kept clean.
- At least three sink basins are required for manual utensil cleaning. Use the first basin to clean utensils, the second for rinsing and the third for chemical sanitizing.
- Replace water when dirty. Air dry and store clean utensils in a protected location.
- Basins must be filled during hours of operation, even if running water is not available.
- Sanitizing solutions shall be equivalent to 50 ppm chlorine (bleach); for other sanitizers follow directions on container. Chemical test strips must be used to measure sanitizer concentration.
- All water storage containers must be cleaned and sanitized before filling and between refilling.
- Wiping cloths shall be stored in a clean sanitizing solution between uses. Paper towels may be used with a sanitizing solution from a spray bottle.

Waste Disposal

- All sewage, including liquid waste, shall be disposed of according to the law.
- Trash shall be held in a manner that does not create a nuisance.

Personal Hygiene

- Handwashing facilities equipped with clean water, soap and paper towels shall be accessible at all times. Hand sinks are to be designated for that use only and posted with an instructional sign. A large container with a free flow stay-on spout may be used to supply clean water when running water is not available.
- Hands and arms must be washed, rinsed and properly dried before starting work and after breaks.
- Common towels are prohibited.
- Wash hands before using single-use gloves and after handling raw foods, coughing/sneezing or whenever contamination occurs.
- The food handler who has fever, vomiting, diarrhea, jaundice (yellow skin or eyes), severe burns/boils/cuts or who is a known carrier of an infectious disease transmittable by food shall not be allowed to work in a food stand. Minor cuts or burns must be covered with both clean adhesive bandages and disposable gloves.

- Hair and sweat restraints are required for all food handlers. No hairnets are allowed.
- Eating, smoking or any personal care is not be done inside stands. Sitting on counters and equipment is prohibited. A single service cup with a lid and straw will be acceptable for drinking inside stands, if stored and used at a non-food preparation location.

Handwashing Procedures

- Clean hands and exposed portions of arms with a hand soap in only those sinks designated for this purpose.
- Lather and wash hands vigorously, rubbing together the surfaces of the hands and arms for at least 20 seconds. Pay particular attention to the areas underneath the fingernails and between the fingers.
- Rinse hands thoroughly with clean potable water and use disposable paper towels to dry hands. The use of common towels, aprons or clothing for drying hands is prohibited.

All the above are derived from the 2017 FDA Food Code as adopted in the Illinois Food Code Title 77 Section 750.
